Packages description

How to play

1. to start the game, click this button  then there will turn up a frame, you can select the packages.

2. click the dissimilarity on the picture to pick up it. Either the left side one or the right is ok.

3. every couple of pictures have 5 areas which are different from each other. They will be marked with a red square when they're clicked.

4. click the sounder button  to turn on/off the background sound.

5. click the pause button  to have a rest. the timer will also pause.

6. click the stop button  to quit from this package, you can turn to another one.

7. every round has 5 couples of pictures. you can not see your scores until this round is finished.

8. click the button at right corner to download more challenging pictures.

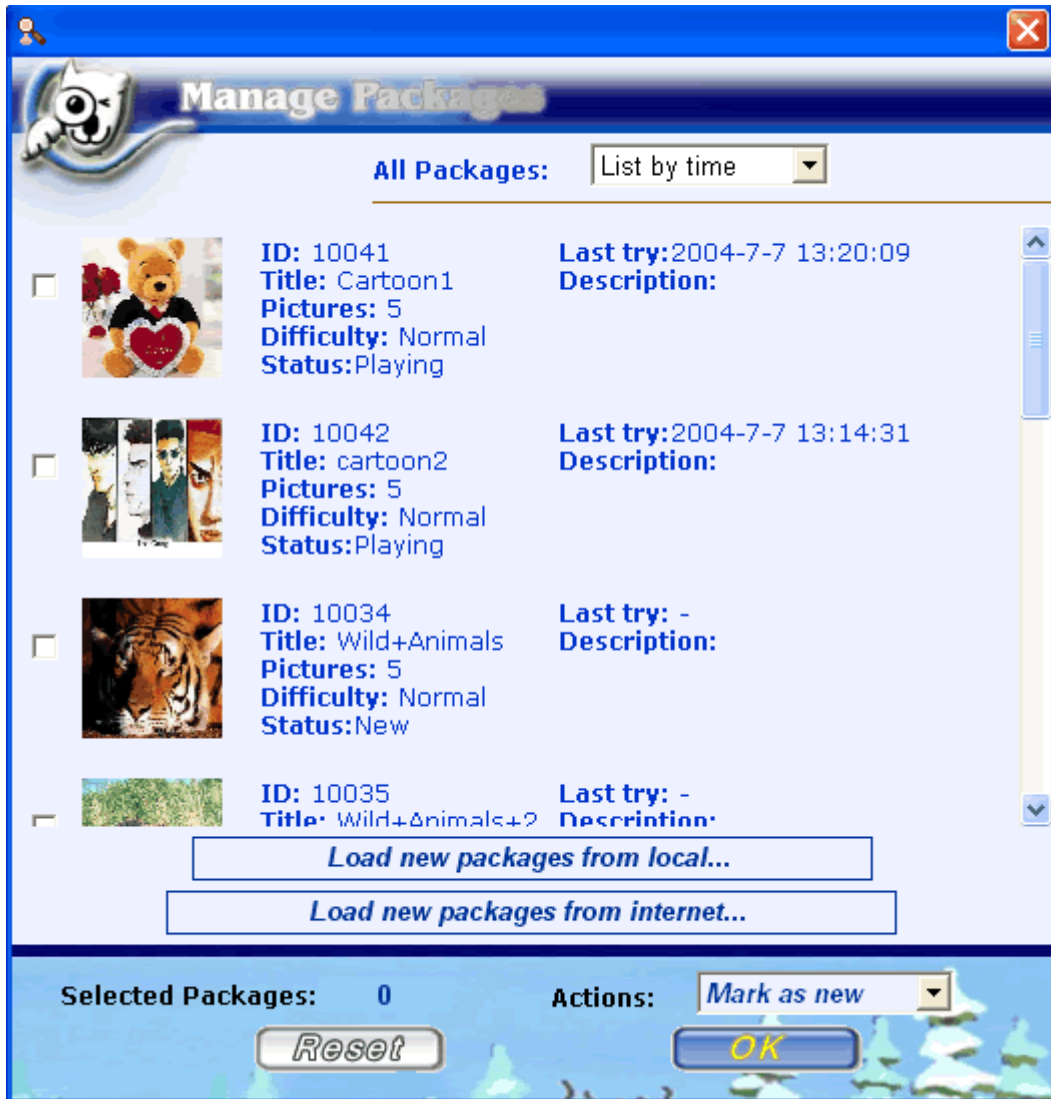

9. two help modes: time stop and magnifier. click time stop button the time will be stopped until you find the right dissimilarity, but the maximum is 30 seconds. magnifier helps you see the pictures clearly, right click can cancel it.

10. you can continue when you open the game next time.

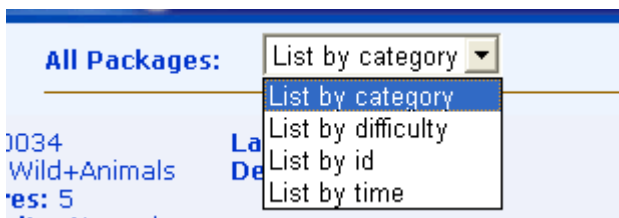

note: please visit our website for more details.

How to edit packages

1. click "edit packages button" , then there will turns up a frame.

2. choose the way to list all packages, including list by category, by difficulty, by id and by time.

3. select the packages you'd like to play, you can also do actions with them, such as mark it / them as new or mark it / them as finished. when you open the game, the packages that marked as new will be in front of the packages that marked as finished.
